# WATER WISDOM

SMART MANAGEMENT OF WATER RESOURCES IN FLORIDA'S FRIENDLIEST HOMETOWN

## Saving Water Outdoors Seek the Leak

Did you know that even a small leak can waste 300 or more gallons of water per month? Check for the following leaks outdoors:

### **Water Faucets, Hoses and Connectors**

Check all faucets, hoses and connectors periodically for leaks and to make sure they are in good working order. Make sure faucets are closed when not in use. If you do find a leaky faucet, change the washer — after turning off the shutoff valve.

### **Automatic Lawn and Sprinkling Systems**

Soft, wet spots on your lawn around the in-ground sprinkler could indicate a leak that is being absorbed into the ground. Contact your plumber or landscape maintenance specialist if repairs are needed.

### **Swimming Pool**

Check the pool system's shutoff valve, which works automatically, to see if it is malfunctioning and causing a continuous cycle of water to be pumped in and then drained out. If the water level stays higher than normal and it overflows when people are using it, call your plumber.
